

## Web Access Management

Essential tools for managing property web access

**Designed specifically for Hotels, Convention Centres and Restaurants that provide Internet access to guests and staff**

- Improve the experience and reduce the costs of delivering quality web access by controlling streaming media, advertising and illegal downloads
- Easily load balance more external connections to add bandwidth with no additional hardware
- Protect your organisation from guest copyright infringement
- Integrate with High Speed Internet Access (HSIA) gateway devices

# Web Access Management

## Essential tools for managing property web access

It's well recognised that the costs of delivering quality guest web connectivity go way beyond the provision and maintenance of infrastructure and bandwidth. Our systems deliver the tools that improve the web experience, give you full control, strengthen your security and reduce your legal liabilities.

Smoothwall Web Filtering and Security solutions are available in a range of virtual, software and hardware appliances. They can be combined with other add-on modules (Web Content Filtering, Email Security, Anti-Malware, Anti-Spam, Firewall & Bandwidth Management) to form a Unified Threat Management solution. For more information please see individual product datasheets or discuss with a technical representative.

Trademarks referred to within this document are the property of their respective owners.

### Protect against copyright infringement (DMCA)

Stop guests downloading and sharing (P2P) illegal films, games and software whilst hiding behind your IP address

### Conserve and manage bandwidth

Improve quality of service - selectively block web advertising and specific streaming media sites

### Ultra-flexible web resource controls

Limit, control and/or deny access to any or all web sites or content type

### Link and load balance

Manage multiple Internet connections across multiple ports

### Highly compatible and flexible network topology

Interacts with Nomadix™, Antlabs™, EthoStream™ systems, DHCP and other gateway & billing tools. Fits and scales to any sized hospitality facility

### Easy to deploy, configure and maintain

'Drop-in' Smoothwall appliance that is built to be ultra-reliable with automatic updates, optional high availability configuration and failover support

### Full firewall functionality

Protects the entire network with robust zoned firewall technology

### Comprehensive logging and reporting

Status, usage, traffic, sites visited, bandwidth, etc. helps you to make decisions with real information

### Employee Web Filtering

With real-time content inspection with Dynamic Content Analysis of both HTTP (& encrypted HTTPS web traffic if required). You can control 'who, what, when and where' your employees access the web – reduce your liabilities and improve productivity
